RE: Letter of transmittal for San Rafael-Kimball Draw S/015/075 reclamation surety

Dear Ms. Eriksen:

The enclosed documents and maps are intended to fulfill USG's reclamation surety requirement, as directed in the June 8, 2006 letter from the Division. This is for the San Rafael-Kimball Draw Quarry (S/015/075), Emery County, UT. This was a small gypsum test quarry that was worked briefly in 1999. It was last inspected by reclamation specialist Paul Baker in 2003, and its condition was documented in a letter to USG dated March 10, 2003.

Included with this letter of transmittal are:

- FORM MR-REV amendments to the March 1999 Notice of Intention to Commence Small Mining Operations S/015/075; a new NOI is enclosed to replace the previous NOI
- A completed FORM MR-RC (SMO) for S/015/075
- A completed Surety Bond Form for S/015/075

Please notify me when you received these materials and please make recommendations if changes are needed.

Thank you for your help and concern in this matter.

Respectfully,

Joseph E. Crawford  
Manager, USG Geological Services  
(312) 606-5707
